INSTRUCTION

Educational Technology

The Port Townsend School District board of directors recognizes that an effective public education system develops students who are globally aware, civically engaged, and capable of managing their lives and careers. The board also believes that students need to be proficient and safe users of information, media and technology to succeed in a digital world.

Therefore, the Port Townsend School District will use educational technology as a powerful and compelling means for students to learn core subjects and applied skills in relevant and rigorous ways. It is the district’s goal to provide students with rich and ample opportunities to use technology for important purposes in schools just as individuals in workplaces and other real-life settings use these tools. The district’s technology will enable educators and students to communicate, learn, share, collaborate and create, to think and solve problems, to manage their work and to take ownership of their lives.

The Port Townsend School District Board of Directors believes that learning will be transformed in schools when technology and other tools serve the individual learner in their everyday learning experiences. All learners (students and teachers) will have the tools, experience and creative frameworks necessary for authentic learning within a community context.

The board directs the superintendent or designee to create strong electronic educational systems that support innovative teaching and learning, to provide appropriate staff development opportunities, and to develop procedures to support this policy.
