Management Support

Video Security on School District Grounds or Property

The Port Townsend School District is committed to maintaining a safe and positive environment for students, staff, community members, and visitors. The board recognizes that the use of video security on its property helps to ensure the safety of school staff, students, community members, and visitors; to protect district property; and to aid in the enforcement of district policies, procedures, and rules. Toward these ends, the Board authorizes the use of video cameras on district property.

The superintendent will develop procedures regarding the use of video security.
